Full-Stack & AI-Enhanced Frontend Engineer

Senior Full-Stack Engineer with 10+ years of experience designing and delivering AI-powered applications, automation platforms, agentic workflows, and complex integrations across global IT environments. Strong ability to bridge business and engineering, translating requirements into scalable, production-ready solutions. Expert in TypeScript/JavaScript, Python, React, React Native, Next.js, Node.js, Django, Flask, FastAPI, and Azure cloud services. Experienced in AI engineering with LangChain, LangGraph, RAG architectures, vector databases, LLM integrations, and automation tools including n8n, Claude, and OpenAI.

Proven experience in technical leadership, Agile delivery, API architecture, incident management, and cross-functional collaboration. Skilled in end-to-end L1–L3 incident and ticket management, automated triage, and escalation workflows to improve reliability, reduce MTTR, and enhance customer satisfaction.

CORE COMPETENCIES

Frontend-Focused Full-Stack Development | TypeScript-First Development | Modern Frontend Architecture (React, React Native, Next.js) | Python (Django, Flask, FastAPI) | Azure & AWS Cloud Platforms | LLM Integration & Prompt Engineering | LangChain & LangGraph Workflows | RAG & Vector Databases | AI Agent Orchestration | Responsive & Mobile-First Design | Interactive 3D Visualisations | Real-Time Applications | State Management | API Integration | Cross-Platform Mobile Development | Performance Optimisation

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Python
Frontend Technologies: React.js, Next.js, Redux, HTML5, CSS3, SASS, Tailwind CSS
AI & LLM Technologies: OpenAI, LangChain, LangGraph, LangSmith, RAG, LLM Fine-Tuning, Prompt Engineering, Embeddings, Semantic Search, AI Agent Orchestration, Multi-Agent Systems, Function Calling, Vapi.
Cloud & DevOps: Microsoft Azure (App Services, Functions, AKS, Blob Storage, Cosmos DB, Cognitive Services, AI Studio, DevOps, Logic Apps), AWS (EC2, S3, RDS, Lambda, DynamoDB, IAM, CloudFormation, EKS, ECS, Bedrock), Docker, Kubernetes, Terraform, CI/CD (GitHub Actions, Azure DevOps, AWS CodePipeline, Jenkins), Cloudflare
Backend & API Development: Django, Flask, FastAPI, TypeScript (Node.js, Express, NestJS), RESTful APIs, GraphQL, Microservices Architecture, Authentication (JWT, OAuth, Azure AD), Serverless Architecture (Azure Functions), WebSockets
Database Management: PostgreSQL, MySQL, MongoDB, Azure Cosmos DB, AWS DynamoDB, Redis, Elasticsearch, Vector Databases (Pinecone, Weaviate)
Testing & Debugging: TDD, Mocha, JEST, Pytest, Cypress, React Testing Library, TypeScript type testing
Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket, Azure Repos, Agile/Scrum, Jira, Confluence, Jira Service Management, ServiceNow, Zendesk

EXPERIENCE & KEY PROJECTS

Senior Full Stack Engineer
Interpublic Group (IPG) | New York, Remote **Feb 2024 – Present**

- Led adoption of agentic workflows integrating Claude and tools into CRM and web apps, reduced manual data entry and improved lead response.
- Architected n8n automation pipelines connecting Dynamics 365, Jira and Datadog with marketing platforms, saving engineering hours. Designed agentic workflows using Claude to automate repetitive support tasks.

- Defined OKRs/KPIs for automation initiatives; decreased incident rates and increased self-service resolution.
- Aligned cross-functional teams (Engineering, Data teams QA, DevOps, Marketing) to execute complex, multi-departmental initiatives.
- Applied flow-based project management principles (Kanban, WIP control, cycle time analysis) as a complement to Scrum ceremonies, adapting to team maturity and delivery context.
- Facilitated stakeholder alignment across technical and non-technical teams, translating operational requirements into actionable tasks with clear ownership and measurable outcomes.
- Led end-to-end frontend development using TypeScript across React.js, React Native, and Next.js, delivering type-safe, self-documenting codebases with reduced runtime errors.
- Built and shipped a cross-platform React Native mobile application with strict TypeScript configuration, achieving seamless iOS/Android deployment and compile-time safety across shared codebases.
- Designed and deployed Retrieval-Augmented Generation (RAG) systems leveraging vector databases to improve LLM response accuracy and reduce hallucinations.
- Implemented AI agents using LangChain, integrating external APIs, databases, and custom tools to automate business workflows.
- Integrated Pinecone vector database alongside traditional databases in a RAG system for hybrid search and Retrieval
- Engineered conversational AI agents with memory and tool-calling capabilities using LangGraph, enabling persistent context across multi-turn interactions and external API integration.
- Built a real-time AI chat interface with streaming responses using Server-Sent Events and TypeScript React, providing low-latency LLM interactions hosted on Azure App Services.
- Implemented CI/CD pipelines for frontend applications using Azure and Vercel, automating preview deployments and production releases with multi-stage validation.
- Built scalable semantic search solutions using Pinecone, enabling low-latency retrieval across millions of embedded documents.

Technical Support Engineer - QA

InfoSys | Canada, Remote **Mar 2022 – Jan 2024**

- Managed L1/L2 ticket systems using Jira, Jira Service Management, and ServiceNow under Scrum methodology.
- Improved ticket classification and routing by configuring automated workflows in ServiceNow and JIRA
- Administered Microsoft Dynamics 365 CRM, including API integrations (REST, JSON) data manipulation via SQL and XML
- Supported data-driven operations by collaborating with teams on reporting pipelines and structured data workflows, bridging technical execution with business visibility needs
- Performed manual and automated QA testing using Charles Proxy and JSON automation.
- Developed, maintained, and enhanced internal tools, documentation, and workflows to improve team efficiency, tickets system and time to response
- Used monitoring tools to proactively identify and resolve production issues.
- Streamlined ticket handling through automation rules that prioritized, assigned tickets and priority automatically
- Administered SharePoint and Docusign, ensuring secure document management.

Full Stack Engineer | Technical and Functional Support - QA

Globant | Buenos Aires, Remote **Feb 2019 – Mar 2022**

- Provided L1/L2 customer troubleshooting for software products using SQL, MySQL, and Python.
- Performed functional and non-functional testing, including performance and regression testing. Established documentation standards.
- Administered AWS environments, Office 365, Microsoft Dynamics CRM, Oracle and CPQ systems.
- Delivered clear, professional written support in English to internal and external stakeholders across multiple regions.
- Architected and delivered full-stack web applications using TypeScript across React frontends, and Node.js, Express and Fastify backends, ensuring type safety and consistency throughout the technology stack.
- Developed Python applications supported by React and Svelte frontends and PostgreSQL databases, improving application performance through code splitting, lazy loading and Redis caching strategies.
- Maintained scalable backend services using Django and Django REST Framework, building secure RESTful APIs for web and mobile applications.
- Designed and developed workflows for automated customer support ticket triage and response generation using TypeScript and Azure Functions, streamlining support operations and improving response times.
- Optimized cloud infrastructure and content delivery using Azure Blob Storage and Azure CDN, improving application responsiveness and user experience for global audiences.

EDUCATION & Certifications

UADE University Argentina, Buenos Aires
Software Development Degree Mar 2018 – Nov 2022

PMI PROJECT MANAGEMENT INSTITUTE Remote Certification
Project Management Professional (PMP), Agile Certification and Disciplined Agile Scrum Master 2024

Marketing in the digital age Certification Rotterdam
Study abroad coursework In InHolland University (exchange program) Feb 2019 – Jul 2019

UTN National Technological University Buenos Aires
Full Stack Web Programming Certification 2018

LANGUAGE

- English (C2)
- Spanish (Native)
